Environmental Policy

Our Policy:

Averm acknowledges the importance of protecting environmental values as part of a global community. Through its planning and practice, Averm is committed to ensuring the protection of the environment by keeping environmental impacts to a minimum in a sustainable, financially rewarding and technically feasible manner.

In addressing this statement, Averm will:

- Consider sustainability issues in the decision making process of planning and managing Averm's operations and activities.
- Facilitate and enhance the decision making process by seeking opinions, feedback and participation from Averm's Senior Management on environmental management issues on Averm sites.
- Promote and encourage environmental awareness and training to ensure individuals throughout the company are aware of their environmental responsibilities.
- Strive for continuous improvement of environmental performance by identifying and addressing environmental risk. Make available procedures for minimising risks that comply with local, state and federal environmental legislation with the goal of attaining best environmental practice.
- Make available resources to implement and meet the requirements of the environmental policy.
- Offer, encourage and develop training courses and research of environmental and sustainable content. Promote external awareness by supporting projects that seek solutions to environmental problems in order to improve the sustainability of the global environment.
